DETAILED ACTION

1. This communication is responsive to Amendment filed 02/27/2006.
2. Claims 2-20 are pending in this application. Claims 2, 10, and 15 are independent claims. In Amendment, claim 1 is cancelled. This Office Action is made non-final.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 2-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 2-20 cite a method for determining values for the last tier of dividers according to a mathematical algorithm. In order for method claims to be statutory, claims must either include a practical application at useful end or a discrete, useful, and tangible result. However, claims 2-20 clearly disclose a method comprising steps of determining and computing values, but they do not disclose the practical application at useful end or a tangible result. The input is a set of numbers and the output is also a set of numbers. Therefore, claims 2-20 are directed to non-statutory subject matter.

Art Unit: 2193
